https://github.com/Perdu
34 years old
Strasbourg, France

Education

2017 **PhD** in Computer Science, INSA Lyon, University of Lyon, France.
2014 **Master** (*Diplôme d'ingénieur*) at Ensimag, Grenoble INP. Semester in Aalto University (Finland).
2011 **DUT** in computer sciences in Metz, valedictorian. Semester in Germany.

Professional experience

2020 - now **Freelance DevOps & System Administrator**

Worked with multiple clients, including:

- **2021 - now** *Software in the Public Interest*
(part time)
 - Migrated production systems (websites, mailing lists, email servers) to cloud platforms (GCP, AWS)
 - Implemented monitoring, backup, and security measures for critical infrastructure
 - Automated deployments and system configuration with Ansible. Public example: Ansible-PGLister
 - Reimplemented a Flask web application in Django (Python), improving maintainability
 - Configured email infrastructure (Exim, SPF, DKIM, DMARC) and Google Workspace integration
 - Handled support requests for multiple open source projects; worked with projects maintainers on patches integration and bug reports
- **2022-02 - 09** *IRIS (Canon group)*
(80% part time)
 - Managed ~50 Linux servers, upgrading systems and implementing security hardening
 - Resolved critical crashes and issues
 - Automated recurring tasks using Ansible

2014 - 2020 **PhD & Postdoc** at *INSA Lyon & Inria*

- Researched privacy, Wi-Fi & Web tracking, GDPR compliance; published 7 articles (1 top-ranked conference)
- Built and deployed a demo Wi-Fi tracking system at public venues (Cité des Sciences, CNIL)
- Automated large-scale analysis of 28,000 websites with custom Python/Selenium script
- Taught computer science (3 years) and collaborated in interdisciplinary teams, including lawyers
- Research cited by Google, discussed at IEEE, referenced in legal action and covered by *Wired & Le Monde*

2011 - 2014 **Internships / Part-time jobs:** *Hochschule Mittweida, Digigram, TDF, CITI Laboratory.*

Technical skills

- DevOps & CI/CD: Ansible, Docker, Git, Gitlab, Bash
- Cloud: GCP, AWS, OVH, Gandi
- OS: Linux (Debian, Arch Linux, Ubuntu, CentOS)
- Software: Apache, NGINX, PostgreSQL, MariaDB, Postfix, Exim, Dovecot, OpenVPN, Nagios, vSphere
- Programming: Python (Flask, Django), PHP
- IaC: Familiar with Kubernetes and Terraform (self-study)

Misc.

French (native), English (excellent), German (average).

Driving license.

Contribution to Open Source:

- Maintainer of various Arch Linux AUR packages, e.g. *wyrd*
- Patches and bug reports to open source projects, including Ansible (Python), libTAS (C++), Consent-O-Matic (Javascript)

Selected personal projects:

- Managing 4 personal servers (Arch Linux/Debian), hosting web / mail / VPN / videoconferencing services (2013-now)
- Built and operated a real-time version of a game, optimizing and monitoring PHP backend performance (2020-21)
- Led dance shows, developing C/C++ software with Kinect sensors and coordinating performers (2016-2018)
- Communicated complex technical concepts to general audiences in journal articles (2015-2021)
- System administrator for student association, migrated Debian server (2012-14)
- Grehack Security Conference - Organization committee (2012 - 2015)
